*\*Boat launch details available at: [www.maine.gov/dacf/boatlaunches](http://www.maine.gov/dacf/boatlaunches)*

## HIKING TRAILS

**Scopan Loop Trail** (moderate to difficult, 3.5-mile roundtrip, allow 5 hours) Taken in a counter-clockwise direction the trail remains relatively level as it proceeds to the western boundary of the wetland, after which the trail becomes steep and maintains a rigorous grade until the summit at the north ridge-line at 1,470 feet. The trail continues by dropping slightly down the west side of the ridge-line. The final 1-mile is a steep grade down before leveling out near the trailhead.

**Access:** Scopan Loop Trailhead is on the east side of Scopan. Take W. Chapman Road to the gravel West Chapman Extension, then two successive right turns. Follow signs to trailhead.

**Kidder Loop Trail** (easy, 0.5-mile loop) Begins and ends at the Adirondack shelter near the ATV trail north of Gate #2.

## MOTORIZED TRAILS

ATV riders enjoy 30+miles of trail plus an adirondack shelter for near-trail camping along the north-west foot of Scopan Mt. The campsite includes a picnic table, fire ring and a .5-mile loop hiking trail, and is close to a stream.

ITS 81 snowmobile trail runs through Scopan along a shared-use road and designated trail. Roads that have multiple designated recreational uses are signed as shared-use. Road users should be prepared to encounter both pedestrians and vehicles. The Bureau does not encourage snowmobiling on lakes or ponds because of potential hazards.

For maps and additional information about Snowmobiling contact the Bureau's Off-road Recreational Vehicle Office at (207) 287-4957. Within Maine Only: 1-800-462-1019.

*This map shows selected access roads. For complete road information use another map, such as The Maine Atlas and Gazetteer.*
