

each gear configuration

_____ Tax map(s)

_____ Riparian list, certified (*if applicable*)

_____ **Corporate applicant information document** and articles of incorporation or documentation of partnership (*if applicable*). This form is required and must be submitted if the applicant is a corporation or partnership (available at <https://www.maine.gov/dmr/aquaculture/forms/standard.html>).

If any portion of the proposed lease site is above mean low water:

_____ **Written permission** from all riparian landowners of the intertidal land on which the lease is proposed.

_____ **Written consent** from the municipal officers (only required if the municipality has a shellfish conservation program per 12 MRSA §6671).

**II.
For
matt
ing**

_____ All pages (including attachments) are numbered sequentially

_____ All attachments are clearly labeled and legible

_____ Drawings and maps are legible, labeled properly, and include all required elements

_____ All questions have been answered and signature pages signed

_____ Please do not staple applications

STANDARD LEASE APPLICATION: NON-DISCHARGE

1. APPLICANT CONTACT INFORMATION

Applicant	Albatross Fisheries
Contact Person	Scott Lord
Address	28 Carlson Ln.

City	St. George		
State, Zip	Me. 04860		
County	Knox		
Telephone	207-691-3552		
Email	Albatross312@yahoo.com		
Type of Application	Draft Application <input checked="" type="checkbox"/> [submitted before scoping session session]		Final Application [submitted after scoping session]
Dates	Pre-Application Meeting: 1/19/22	Draft Application Submitted: 3/14/22	Scoping Session:
Payment Type	Draft Application: Check (included) <input checked="" type="checkbox"/> Credit Card	Final Application: Check (included) <input type="checkbox"/> Credit Card	

Note: The email address you list here will be the primary means by which we will contact you. Please provide an email address that is checked regularly. If you do not use email, please leave this blank.

2. PROPOSED LEASE SITE INFORMATION

Location of Proposed Lease Site	
Town	St. George
Waterbody	End of St. George River
General Description (e.g. south of B Island)	Deep cove, west of Port Clyde
Lease Information	
Total acreage requested (100-acre maximum)	4
Lease term requested (20-year maximum)	20
Type of culture (check all that apply)	Suspended (gear in the water and/or on the bottom)
Is any portion of the proposed lease site above mean low water?	No <input checked="" type="checkbox"/>

Note: If you selected yes, you need to complete the steps outlined in the section titled: "19. Landowner/Municipal Permission Requirements".

3. GROWING AREA DESIGNATION

Directions: Information for growing area designations can be found here:

<https://www.maine.gov/dmr/shellfish-sanitation-management/closures/index.html>

Growing Area Designation (e.g. WL):	WU
Growing Area Section (e.g. "A1"):	

Note: If you are proposing to grow molluscan shellfish in waters classified as anything other than open/approved, you will need to contact the Bureau of Public Health to discuss your plans at the following email: DMRPublicHealthDiv@maine.gov

4. SPECIES INFORMATION

A. Please complete the table below and add additional rows as needed.

Name of species to be cultivated (include both common and scientific names):	Name and address of the source of seed stock or juveniles	Maximum number (or biomass) of organisms you anticipate on the site at any given time
<ul style="list-style-type: none"> 1. Sugar kelp (Saccharina latissima), Skinny kelp (Saccharina angustissima), Winged kelp (Alaria esculenta), Horsetail kelp (Laminaria digitate), Dulse (Palmaria palmate), Irish sea moss (Chondrus crispus), Laver (Porphyra), Sea Lettuce (Ulva lactuca), Shotgun Kelp (Agarum cribosum) 	Atlantic Sea Farms 20 Pomerleau St. Biddeford, Me. 04005	120,000 lbs + or -
2.		
3.		
4.		

5.		
----	--	--

B. Do you intend to possess, transport, or sell whole or roe-on scallops? No <input checked="" type="checkbox"/>

If you answered “yes” please contact the Bureau of Public Health to discuss your plans at the following email: DMRPublicHealthDiv@maine.gov

Note: If you are proposing to grow molluscan shellfish, this application also serves as your written operational plan as required in the National Shellfish Sanitation Program (NSSP) Model Ordinance Chapter 2 and must be maintained in your files. If you wish to submit an operational plan separate from this application, please contact: DMRPublicHealthDiv@maine.gov

5. VICINITY MAP

Note: Please label as: ‘Vicinity Map’.

Directions: Using a NOAA Chart or USGS topographic map, show the area within a minimum of one-half mile of the proposed lease site.

The map needs to display the following:

- The waters, shore lands, and lines of mean high and mean low water within the general area of the lease
- An arrow indicating true north
- A scale bar
- The approximate lease boundaries

6. BOUNDARY DRAWING

Note: Please label as: ‘Boundary Drawing’.

Directions: Depict the boundaries of the proposed lease site. Provide a drawing with all corners, directions, and distances labeled. Provide coordinates for each corner as follows:

- Coordinate Description
Provide geographic coordinates for each corner of the lease site in latitude and longitude as accurately as possible (e.g., to the nearest second or fraction of a

second). Identify the datum from the map, chart, or GPS unit used to develop these coordinates. The datum will be shown on the map or chart you are using. The Coordinate Description may be provided separately from the Boundary Drawing.

7.

**SITELEVEL
OPMENT**

Directions: If your operations require the use of cages, nets, ropes, trays, or any object (structure) other than the organism to be grown directly on the bottom or buoys to mark the corners of the lease site, you must submit gear drawings and maximum structure schematics (information below). This section is intended to provide accurate plans depicting the physical structures to be placed in the proposed area. All dimensions need to be labeled with the appropriate units (i.e. 10ft, 10in). If you are proposing a bottom lease (no gear), please skip to question “F. Marking”.

Note: You may embed the schematics within the document or attach them to the end of your application. If you attach the schematics, please label them according to the instructions provided below.

**A. Gear
Informati
on**

Directions: Include a drawing of an individual piece of gear for each of the gear type(s) you plan to use. Include units referenced (i.e. 10in, 10ft, etc.).

1. **Gear Drawing:** Please include the following for each gear type that will hold organisms to be cultured (e.g. polar circles, marine algae longlines, oyster cages) and label as “Gear Drawing”. This view must show the following:
 - Length, width, and height of each gear type.
2. **Gear Table:** List and describe each individual gear type that you will use in the table below. (e.g. polar circles, marine algae longline, oyster cages, moorings, mooring lines, buoys, etc.).

Specific Gear Type <i>(e.g. soft mesh bag)</i>	Dimensions <i>(e.g. 16"x20"x2")</i>	Time of year gear will be deployed <i>(e.g. Spring, Winter, etc.)</i>	Maximum amount of this gear type that will be deployed on the site <i>(i.e. 200 cages, 100 lantern nets, etc.)</i>	Species that will be grown using this gear type
--	---	---	--	--

1900 lb. concrete moorings	4' x 4' x1'	Year round	32	
1/2 Galv. chain	12'	Year round	32	
32 mooring Lines	7/8" x 45-50'	year round	32	
32 Mooring Balls	Approx 2'	Fall thru Spring	32	
187 Bouys	Approx 7x14	Fall thru Spring	187	
17 Longlines	1000' x3/8"	Fall thru Spring	17,000'	Marine Algae

B. Maximum Structure and Mooring System Schematic

Directions: Include drawings of your maximum gear layout. Include units referenced (i.e. 10in, 10ft, etc.).

1. Overhead View. Please include the following and label as “Overhead View”:

- Maximum layout of gear, including moorings.
- Length and width of project.
- Approximate spacing between gear.
- Lease boundaries and the location of proposed corner markers and any additional gear markers that would be present.

2. Cross-Section View. Please include the following and label as “Cross-Section View”:

- The sea bottom.
- Profile of gear in cross-section as it will be deployed.
- Label gear with dimensions and materials.
- Show mooring gear with mooring type, scope, hardware, and line type and size.
- Depth of gear in relation to the water’s surface at mean low water and mean high water (if applicable).

Note: Please include an additional Cross Section View, depicting the elements listed above, if there will be seasonal changes to gear layout (i.e. over wintering).

1. Describe structures such as barges, sheds, etc., to be located on-site. Provide a schematic and indicate the dimensions, including height above sea level, materials, etc.

There will be no structures on site.

2. Describe the storage and use of oil, gasoline, or other hazardous materials on site. If petroleum products are to be stored on site, provide a spill prevention plan.

There will be no storage of petroleum or hazardous materials on site.

D. Gear Color

Provide the color of the gear and structures proposed to be used at the lease site.

The site will be marked in accordance with DMR regulations and harbor masters recommendations with yellow markers on the corners and the center of the exterior of the site. The other poly balls will be either yellow or green. The floatation bouys could be white, red, or yellow.

E. Equipment Layout

Provide schematic or photographic renderings of the generalized layout of the equipment as depicted from two vantage points on the water. Provide the locations of the two vantage points.

F. Marking

Will you be able to mark your site in accordance with DMR regulations, Chapter 2.80? In part, this requires marker buoys which clearly display the lease ID and the words SEA FARM to be located at each corner of the lease.

Yes

If you answered no, explain why and suggest alternate markings.

Note: If a lease is granted, you will also be required to mark the site in accordance with appropriate

US Coast Guard Regulations. If you have questions about US Coast Guard Regulations contact:

1st Coast Guard District, Aids to Navigation Office ((617)-223-3293).

8. PRODUCTION ACTIVITIES

Directions: If you are cultivating more than one species, you will need to provide the following information for each species. Please attach additional pages if needed.

A. Please explain your proposed seeding activities. What months will seeding occur and how often will you be onsite to seed during this time.

Seeding will occur no earlier than October 1st. Depending on weather and seed availability seeding should take 4 days.

B. Please explain your proposed tending/maintenance activities.

When on site we will be checking for line tension, chaffage, and entangled lines/bouys.

C. How frequently will you visit the site for routine tending/maintenance (i.e. flipping cages, etc.)?

The site will be checked at least every 2 weeks as long as weather permits during grow-out or more frequently after severe weather event.

D. Describe the harvesting techniques you will use. If you plan on using a drag, please provide the dimensions.

Harvesting will take place using a lobster boat and small skiff to haul on the lines, cut off kelp, and store the grow lines for the summer season on land.

E. How often will you be at the site during harvesting periods?

Harvesting and removal of longlines will occur between late March and June 1st at the latest and will require approximately ten days on sight. All horizontal longlines will then have been removed and will not be present at the site from June 15th through the start of October at the earliest.

F. Will gear be on the site year-round? No, only moorings

G. Describe any overwintering or “off season” plans for the site. For example, will you remove gear from the site and/or deploy gear in different areas within the proposed site? Please include where gear or product will be located if removed from the site.

Off season all grow lines and bouys will be removed and stored on land. The site will then consist of only mooring lins which will be sunk to the bottom for the summer months to avoid all conflicts with commercial and recreational uses in the area.

H. Please provide details on any predator control techniques you plan to employ.

No predator control will be used.

- Suspended culture gear can attract birds that roost on the gear and defecate, potentially creating a pollution source impacting shellfish held within the gear. In order to comply with the National Shellfish Sanitation Program (NSSP) Model Ordinance (MO), DMR is requiring that applications for the suspended culture of shellfish include a description of mitigation or deterrent measures to minimize the potential pollution impacts of birds at the proposed site. If appropriate, include sketches or photos that clearly depict those measures put into practice.

Examples may include:

- Submerging suspended gear and associated product at a depth sufficient to deter roosting for two weeks before harvest
- Attaching physical deterrents (i.e. zip ties) to gear
- The site is proposed for the culture of seed only
- The site is proposed for the culture of adductor-only scallops (i.e. no other shellfish species would be grown on the site)
- Proposed gear would always be suspended below the surface of the water at a depth sufficient to deter roosting (i.e. as is common for scallop lantern nets)

All kelp grow lines would be approx. 7 feet below the surface leaving only the bouys on the surface which would not promote roosting.

9. NOISE AND LIGHT

Directions: If a question does not pertain to your proposed operations, please write “**not applicable**” or “N/A”.

- A. What type of boats will be used on the site? When and how often will these vessels be on the site?

A lobster boat and a small skiff would be used for all activities on site and would be only during daylight hours unless drastic emergency use needed.

B. What type of powered equipment (e.g. generator, power washer, grading equipment, barges, etc.) will be used on the site? When and how often will the equipment be used?

N/A

C. Specify how you intend to reduce noise levels from the boats and other powered equipment.

There should be no undue noise associated with the boat or small outboard skiff as all activity will not require much speed therefore low rpms and sound.

D. Provide the number, type (whether fixtures are shielded), wattage and location of lights, other than those used for navigation or marking, that will be used at the proposed lease site.

Because all activities will occur during the daylight hours no lighting should be necessary. The boat does have deck lights which are down-facing if needed and would not cause undue disturbance to surrounding land.

E. Indicate under what circumstances you might work at your site beyond daylight hours.

The only reason to work past daylight hours would be weather related repairs not able to be completed during daylight and would be extremely rare if ever.

10. CURRENT OPERATIONS

Directions: If a question does not pertain to your proposed operations, please write “**not applicable**” or “N/A”.

A. Describe your existing aquaculture operations, including the acronyms of all active leases and/or licenses.

I currently have 1 experimental lease, STG DC2x. I also have 3 LPA's for oysters in a different area, SLOR321, SLOR421, SLOR521.

B. What are your plans for any existing leases and/or Limited Purpose Aquaculture (LPA) licenses if the lease is granted? Will any existing leases and/or LPA licenses be relinquished if the lease is granted? If so, please indicate which ones.

I will relinquish the experimental and replace with this standard in the same area. I will keep the LPA's.

11. ENVIRONMENTAL CHARACTERIZATION

Directions: Using your knowledge of the area, describe the environment of the proposed lease site. Be sure to include units of measurement in your answers (i.e. feet, cm/s).

A. What are the approximate depths at mean low water?

30 to 35 feet

B. What are the approximate depths at mean high water?

40 to 45 feet

C. Provide the approximate current speed and direction during the ebb and flow.

.5 knot mostly, the direction is variable because the tide eddys due to the position of the cove and the strong current of the river but the main current is north-south.

D. The following questions (D.1 through D.6) may be answered in writing or by submitting a video. If you plan to submit a video, please contact the Department prior to video collection.

1. What are the bottom characteristics (mud, sand, gravel, rock, ledge or some mix, etc.)?

Soft mud

2. Describe the bottom topography (flat, steep rough, etc.).

Flat

3. Describe marine organisms by species or common names. Based on your personal observations or other sources of information, are these species abundant, common, or rare?

Lobster as well as small crabs are common in the early summer. Groundfish would be rare.

4. Are there shellfish beds or fish migration routes in the surrounding area? If so, please describe.

There are no shellfish beds in the area. There are no known fish migration routes at or near this site.

5. Describe the presence and extent of submerged aquatic vegetation, i.e. eelgrass, within the proposed lease area. Please include the date of this observation along with the method of observation. If submerged aquatic vegetation is observed, please also describe the abundance below and sketch the limits of the beds in the vicinity map.

There is no known aquatic vegetation in the area of the site due to the depth. I have never seen any vegetation while retrieving moorings in the previous years. 10/01/19 thru current

6. Describe the general shoreline and upland characteristics (rocky shoreline, forested, residential, etc.)

The shoreline is rocky leading up the spruce forest with the majority of the houses being seasonal.

E. Is your proposed lease located within a Maine Department of Inland Fisheries and Wildlife designated Essential Habitat?

No

Note: The location of Essential Habitats in the State of Maine, along with information on how projects within these areas are reviewed, can be found here:

<https://www.maine.gov/ifw/fish-wildlife/wildlife/endangered-threatened-species/essential-wildlife-habitat/index.html>

If a project is located within an Essential Habitat, applicants are strongly encouraged to contact the MDIFW Environmental Review Coordinator (John.Perry@maine.gov, phone: 207-287-5254) prior to application submission.

12. EXISTING USES

A. Describe the existing uses of the proposed area in questions A.1 through A.5 below. Please include the a) type b) time of year c) frequency and d) proximity to the lease site for each existing use.

1. Commercial Fishing

Some lobster fishing takes place at the site from June til mid September but no fishing occurs when longlines would be seeded and growing. I have observed little lobstering there unless tight to the shore or in the deep water to the south. Talking with other fishermen agree as well. There is no dragging or diving for scallops or urchins due to the soft bottom.

2. Recreational Fishing

No recreational fisherman target this area to my knowledge.

3. Boating Activities (please also include the distance to any navigable channel(s) from your proposed site at low water)

The Channel entering and exiting the St. George is used year-round but is approximately 1000 feet away and the site would in no way impede traffic. Boat traffic around the site would be mostly boats with a draft of 5' or less which could travel around the farm. Very little traffic would occur during growout season.

4. Ingress and egress (i.e. coming and going) of shorefront property owners within 1,000 feet of the proposal (e.g. docks, moorings, landing boats on shore, etc.)

There are some moorings near the shore but the closest would be approximately 800 feet away and would not conflict with the site. They are used in the summer only primarily. There are no docks within 1000'. This site would not affect any ingress or egress.

5. Other uses (kayaking, swimming, etc.)

There may be some kayaking during the summer months but not when the longlines are present.

B. Are there private docks, moorings, or other access points within 1,000 feet of the proposed lease? If yes, please include approximate distance from the proposed lease.

There are some moorings near the shore but the closest would be approximately 800 feet away and would not conflict with the site. They are used in the summer only primarily. There are no docks within 1000' of site.

C. Are there public beaches, parks, docking facilities or federally, state, or municipally conserved lands within 1,000 feet of the proposed lease site? If yes, please describe and include approximate distances from proposed lease.

N/A

D. Are there any Limited Purpose Aquaculture (LPA) licenses or aquaculture leases within 1,000 feet of your proposed lease site? If yes, please list their acronyms below.

Current and pending aquaculture leases and active LPA licenses may be found here:
<https://www.maine.gov/dmr/aquaculture/leases/index.html>

About 980' N.E. is JSCH820.
About 110' S.W. is STGDC3X.
About 400' S.W. is STGDC1X.

13. EXCLUSIVE USE

If your lease is granted, what activities would you request be excluded from occurring within the boundaries of the lease site? In your answer please address applicable commercial and recreational fishing, boating activities, and other activities you listed in the 'Existing Uses' section of this application.

As long as longlines are in place, generally from October 1st through June 1st, I request the prohibition of lobster traps, dragging of any kind, or any other form of commercial fishing that could potentially entangle or otherwise harm the gear design or seaweed growing at the site. Additionally I would request any boats traveling through lease site have a draft of less than 5' when longlines are present. For the rest of the year I would welcome any activity in the site as long as it did not interfere with the moorings left at site.

14. RIPARIAN LANDOWNERS AND SITE ACCESS

A. If your lease is within 1,000ft of shorefront land (**which extends to mean low water or 1,650 ft. from shore, whichever is less, according to NOAA charts**), the following supporting documents are required:

1. A labeled copy of a tax map(s) depicting the location of the proposed lease site and including the following elements:

- Label the map “Tax Map: Town of (name of town).”
 - Legible scale
 - Tax lot numbers clearly displayed
 - The boundaries of the proposed lease
2. Please use the Riparian Landowner List (included on the next page) to list the name and address of every shorefront landowner within 1,000ft of the proposed lease site. Have the tax collector or clerk of the municipality certify the list. Refer to the riparian determination guidance document to ensure all riparian landowners are included:

<https://www.maine.gov/dmr/aquaculture/forms/documents/RiparianDetermination.pdf>

Note: When the application and riparian list are both ready to be submitted, you may choose to email a copy of the riparian list and proposed lease coordinates to DMRAquaculture@maine.gov for staff to verify that all required parcels are included on the list *before* having it certified by the municipality. DMR will not verify a riparian list multiple times, so please ensure there will be no additional changes to the application before emailing the riparian list for verification.

3. If any portion of the site is intertidal, you need to complete the steps outlined in the section titled: “19. Landowner/Municipal Permission Requirements”.

B. Will your access to the lease area be across riparian land?	
N/A	
Yes	No <input checked="" type="checkbox"/>

Note: If you selected yes, you will need to complete the landowner permission requirements included in “19. Landowner/Municipal Permission Requirements” of this application.

C. How will you access the proposed site?
<u>Access will be from the Port Clyde co-op and possibly the Port Clyde public landing.</u>

D. How will your proposed activities affect riparian ingress and egress?

I can not foresee any issues with ingress or egress effecting riparian landowners.

**RIPARIAN
LANDOWNER LIST**

****THIS LIST MUST BE
CERTIFIED****

On this list, please show the current landowners' names and mailing addresses as listed in the municipal tax records for all riparian shorefront parcels within 1,000 feet of the proposed lease site along with the map and lot number for each parcel. **It is the applicant's responsibility to assemble the information for the Town Clerk to certify.** The Town Clerk *only* certifies that the information is correct according to the Town's records. Once you have completed the form, ask the Town Clerk to complete the certification section below. If the parcels are within more than one municipality, provide a separate, certified riparian list for each municipality.

TOWN OF:

MAP #	LOT #	Landowner name(s) and address(es)

Please use additional sheets if necessary and attach hereto.

**CERTI
FICATIO**

N

I, _____, Town Clerk for the Town of _____ certify that the names and addresses of the property owners listed above, as well as the map and lot numbers, are those listed in the records of this municipality and are current as of this date.

SIGNED: _____ **DATE:** _____

15. TECHNICAL CAPABILITY

Provide information regarding professional expertise. Attaching resume or documentation of practical experience necessary to accomplish the proposed project would satisfy this requirement.
I personally own all boats and skiffs required to this project. I have been a commercial fisherman for over 20 years and currently hold a 100 ton master USCG license as well as AB Seamen license in good standing. I have held an eperimental lease and have been growng kelp on it for 3 years.

16. FINANCIAL CAPABILITY

- Financial Capability

Please provide documentation to show you have the financial resources to implement the proposal. For example, you may submit a letter from a financial institution or funding agency indicating that you have an account in good standing, or their willingness to commit funds. Note: Any financial information you submit with your application is part of the public record. Please exercise discretion when submitting financial information.
Please see attached letter.

B. Cost Estimates

Please provide cost estimates of the proposed aquaculture activities.

This site will not require much further investment due to the fact of this is a transition from an existing experimental site and everthing is already in place. I have invested over \$10,000 in moorings, chain, rope, and bouys. The only finacial burden will be the lease fees and bond.

17. ESCROW ACCOUNT OR PERFORMANCE BOND

Check the category that describes your operation:

Check Here	Lease Category	Amount of Required Escrow or Performance Bond
No gear/structure, no discharge	\$500.00	
No gear/structure, discharge	\$500.00	
≤ 400 square feet of gear/structure, no discharge	\$1,500.00	
>400 square feet of gear/structure, no discharge	\$5,000.00*	
Gear/Structure, discharge	\$25,000.00	

*DMR may increase the bond/escrow requirements for leases with more than 2,000 square feet of structure.

I, (printed name of applicant) SCOTT Lord have read DMR Aquaculture Regulations Chapter 2.64(10) (D) and if this proposed lease is granted by DMR, I will either open an escrow account or obtain a performance bond, in the amount determined by the lease category.

 - President

3/12/2022

Applicant Signature

Date

Note: Add title if signing on behalf of a corporate applicant.

ADDITIONAL APPLICANTS: Each applicant must sign this section indicating that they will open an escrow account or obtain a performance bond. Use the space below for additional persons listed on the application. You may attach additional pages, if necessary.

I, (printed name of applicant) SCOTT Lord have read DMR Aquaculture Regulations Chapter 2.64(10) (D) and if this proposed lease is granted by DMR, I will either open an escrow account or obtain a performance bond, in the amount determined by the lease category.

Note: Add title if signing on behalf of a corporate applicant.

18. APPLICANT SIGNATURE PAGE

I hereby state that the information included in this application is true and correct. I have also read and understand the requirements of the Department's rules governing aquaculture and the application instructions pertaining to the standard lease process.

Printed name: SCOTT Lord

Title (if corporate applicant): President

Signature: Scott Low Date: 3/12/2022

18 U.S.C. Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry, shall be fined not more than \$10,000 or imprisoned not more than five years or both.

Note:

- All applicants must sign and date this page. Please use the space below, if additional signatures are required.
- Corporate applicants, please be sure to include the title(s) (i.e. President, Treasurer, etc.) of the individual(s) signing on the company's behalf.

Additional Applicant:

Printed name: _____

Title (if corporate applicant): _____

Signature: _____ Date: _____

19. LANDOWNER/MUNCIPAL PERMISSION REQUIREMENTS (if applicable)

Directions: If any portion of the site is intertidal, you need to complete the steps outlined below.

Step I: Obtain written permission from all intertidal landowners.

Pursuant to DMR Regulations Chapter 2.10(3)(G) the Department requires *written permission of every owner of intertidal land in, on, or over which the activity will occur*. It is your responsibility to obtain written permission and include it with your application materials. Please note that the Department does not provide forms for landowner permission.

Step II: Determine if the municipality where your site is located has a shellfish

conservation program.

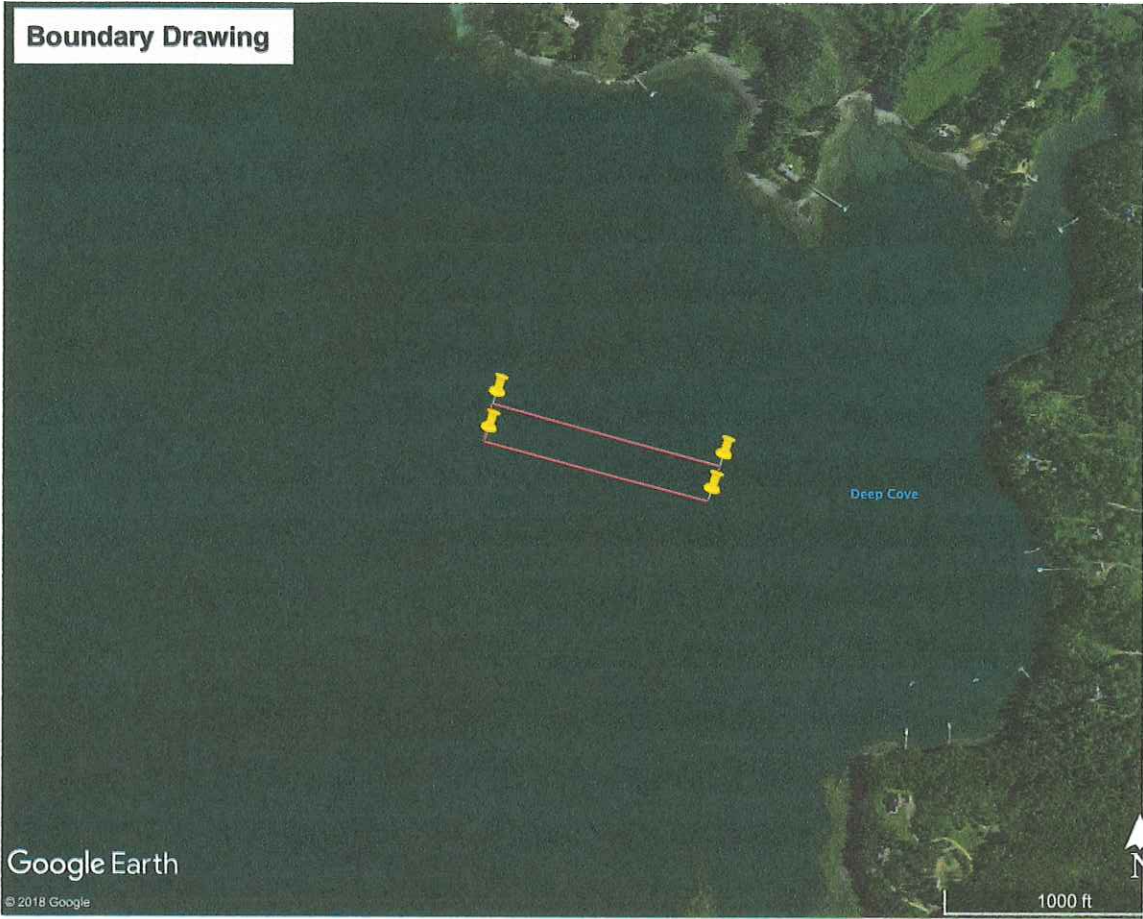

Pursuant to 12 MRSA §6072(3) *In any municipality with a shellfish conservation program under section 6671, the Commissioner may not lease areas in the **intertidal zone** within the municipality without the consent of the municipal officers.*

If the municipality where the proposed lease site is located has a shellfish conservation program, it is your responsibility to obtain consent for the proposed lease site from the municipal officers (i.e. the selectmen or councilors of the town, or the mayor and aldermen or councilors of a city.) Consent means a majority vote of the municipal officers as recorded in a public meeting.

It is your responsibility to contact the municipality and determine if they have a shellfish conservation program. Best practices would include discussing your plans with shellfish committee members, but only the consent of municipal officers is required.

Does the municipality, where the proposed site is located, have a shellfish conservation program? Yes No
--

If you answered yes, please attach documentation from a public meeting demonstrating that a majority of municipal officers have consented to your proposal.

MAINE DEPARTMENT OF MARINE RESOURCES

Aquaculture Division, 21 State House Station, Augusta, ME 04333-0021 (207) 624-6567

**CORPORATE APPLICANT FORM
For Standard and Experimental Aquaculture Lease Applications**

Corporations or partnerships that apply for aquaculture leases in the State of Maine must complete this form. Corporations must submit information as requested under A. Corporate Applicant. Partnerships must submit information as requested under B. Partnership Applicant.

A. Corporate Applicant

Note: You must attach a copy of the Articles of Incorporation (Inc.) or Certificate of Formation (LLC) to your application.

1. Name of Corporation: Albatross Fisheries

2. Date of incorporation: 5/16/2016 State of incorporation: Me.

3. List the names, addresses, and titles of all officers:

Name	Address	Title
SCOTT Lord	28 Carlson Ln. St. George Me. 04860	President
Sheena Lord	same	Vice-President

Please use additional sheets if necessary and attach to the application.

4. List the names and addresses of all directors/members:

Name	Address
same as above	

Please use additional sheets if necessary and attach to the application.

5. Has the corporation, or any stockholder, director, or officer applied for an aquaculture lease for Maine lands in the past? Yes No

If you selected "yes," please indicate who applied for the lease and the status of the application or lease. *Albatross Fisheries currently has experimental lease STG-DC 2X which will be replaced by this standard lease.*

6. List the names and addresses of all stockholders who own or control at least 5% of the outstanding stock and the percentage of outstanding stock currently owned or controlled by each stockholder.

Name	Address	Percentage of Owned Stock
SCOTT Lord	28 Carlson Ln. St. George, Me. 04860	50%
Sheena Lord	same as above	50%

Please use additional sheets if necessary and attach to the application.

7. List the names and addresses of stockholders, directors, or officers owning an interest, either directly or beneficially, in any other Maine aquaculture leases, as well as the quantity of acreage from existing aquaculture leases attributed to each such person based on the percentage of owned stock listed in question 6. If none, write, "None."

Name	Address	Lease Acronym	Acreage
SCOTT Lord	28 Carlson Ln. St. George, Me 04860	SLOF321 SLOF421 SLOF521	400 sq feet same
Sheena Lord	same as above		same

Please use additional sheets if necessary and attach to the application.

8. Has the corporation or any officer, director, member, or shareholder listed in item 5 above ever been arrested, indicted, convicted of, or adjudicated to be responsible for any violation of any marine resources or environmental protection law, whether state or federal?

Yes No

A True Copy When Attested By Signature

Deputy Secretary of State

Pursuant to 31 M.R.S.A. §1531, the undersigned executes and delivers the following Certificate of Formation:

FIRST: The name of the limited liability company is:

Albatross Fisheries, LLC

(A limited liability company name must contain the words "limited liability company" or "limited company" or the abbreviation "LLC," "LLC," "L.C." or "LC" or, in the case of a low-profit limited liability company, "L3C" or "L3c" -- see 31 M.R.S.A. 1506.)

SECOND: Filing Date: (select one)

Date of this filing; or

Later effective date (specified here): _____

THIRD: Designation as a low profit LLC (Check only if applicable):

This is a low-profit limited liability company pursuant to 31 M.R.S.A. §1611 meeting all qualifications set forth here:

- A. The company intends to qualify as a low-profit limited liability company;
- B. The company must at all times significantly further the accomplishment of one or more of the charitable or educational purposes within the meaning of Section 170(c)(2)(B) of the Internal Revenue Code of 1986, as it may be amended, revised or succeeded, and must list the specific charitable or educational purposes the company will further;
- C. No significant purpose of the company is the production of income or the appreciation of property. The fact that a person produces significant income or capital appreciation is not, in the absence of other factors, conclusive evidence of a significant purpose involving the production of income or the appreciation of property; and
- D. No purpose of the company is to accomplish one or more political or legislative purpose within the meaning of Section 170(c)(2)(D) of the Internal Revenue Code of 1986, or its successor.

FOURTH: Designation as a professional LLC (Check only if applicable):

This is a professional limited liability company* formed pursuant to 13 M.R.S.A. Chapter 22-A to provide the following professional services:

(Type of professional services)
